Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 9 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by applicant's admitted prior art.

Re claim 9, applicant's admitted prior art discloses a vehicle sun visor comprising an extendable plate (140), a visor body (120), wherein the extendable plate is slidably movable within the visor body between a first position and a second position, a first removal-preventing member (151), a second removal-preventing member (152), a recess wall surface formed by one of the first removal-preventing member or the second removal-preventing member (see the figure below), wherein the extendable plate includes one of the first removal-preventing member or the second removal-preventing member, wherein the visor body includes the other of the first removal-prevention member or the second removal-preventing member, wherein a tip of one of the first removal-preventing member or the second removal-preventing member engages the recess wall surface when the extendable plate is in the second position.

Re claim 12, applicant's admitted prior art discloses a vehicle sun visor comprising an extendable plate (140), a visor body (120), wherein the extendable plate is slidably movable along a lengthwise direction relative to and within the visor body between a first position and a second position, a first protruding member (151) orthogonal to the length wise direction, a second protruding member (152) orthogonal to the lengthwise direction, wherein one of the first protruding member or the second protruding member is integrated with an inner wall surface of the visor body, a removal-preventing recess formed by the one of the first protruding member or the second protruding member and the inner wall surface of the visor body, wherein an other of the first protruding member or the second protruding member is integrated with a surface of the extendable plate, wherein a tip of the other of the first protruding member of the second protruding member is inserted into the removal-preventing recess when the extendable plate is in the second position (see the figure below).

FIG. 6
PRIOR ART

Art Unit: 3612

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art in view of Sturt (US Patent 6,604,772).

Applicant's admitted prior art discloses all the limitations of the claims, as applied above, except for the visor body being formed of a first visor body half and a second visor body half, the two halves being hingedly connected.

Sturt discloses a visor body being formed of a first visor body half and a second visor body half, the two halves being hingedly connected.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify a visor body, such as that disclosed by applicant's admitted prior art, to have a first visor body half and a second visor body half, the two halves being hingedly connected, as taught by Sturt, in order to construct the visor in a manner that is commonly used in the prior art and is easily produced.

Allowable Subject Matter

6. Claims 4-8 are allowed.

Art Unit: 3612

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sturt et al., Miller et al., Wu et al., Peterson, Vandagriff, and Crotty, III et al. disclose vehicle sunvisors.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason S. Morrow whose telephone number is (571) 272-6663. The examiner can normally be reached on Monday-Friday, 8:00a.m.-4:30p.m..
